	Smooth or faceted Agate (mint colour)				Smooth Snow quartz (white)		

Please Note

The quality of the freshwater pearl is determined by its size and shape – the more symmetrical, the finer its quality. Freshwater pearls are soft and delicate by nature and may scratch over time if used in a pendant or bracelet clasp. We recommend that freshwater pearls be used solely with Changeling rings, and that you choose snow quartz for clasps or pendants if you prefer the white color.

Some stones are dyed to achieve their bright color.
